ADVANTAGES

Torrified Wheat has been heat treated to break the cellular structure, allowing more rapid hydration and malt enzymes to more completely attack the starches and protein. Torrified Wheat can be used in place of raw wheat when making Belgian-style White and Wit beers. Advantages over raw wheat include normal conversion time and higher yield.

CHARACTERISTICS AND APPLICATIONS

- Mill medium coarse.
- Add to the mash along with the malt.
- Mash as usual
- Can be used up to 40% of the total grist bill.
- To increase lautering time, include a small amount of rice hulls.
