Section 2: Hazard(s) Identification

GHS Hazard Class: This product does not meet the physical, health, or environmental classification of GHS (Globally Harmonized System)

Hazard Classification: Not classified as hazardous based on IARA, IMDG, and DOT

Signal word: Warning: May form combustible dust concentrations in air (during processing and handling). Product dust may cause mild irritation

Hazard statement: Mild eye irritant  
May caused difficulty breathing if inhaled  
May create flash fire or explosion hazard if sufficient concentration of dust is dispersed and exposed to an ignition source.

Precautionary Statement: Eye irritant- Rinse eye with water for several minutes  
Avoid breathing dust- Excessive inhalation may affect throat, nose, and lungs  
When dispersed into the air in sufficient concentrations, like all dusts, can explode in the presence of an ignition source. Do not allow dust to become dispersed into the air, even by the extinguishing agent. Minimum explosive concentration is 25-55 mg/m³. However, moisture content, particle size, caloric properties, and specific ingredients also affect the explosiveness of grain dust. Avoid ignition sources.

Section 3: Composition/ Information on Ingredients
